

Statement Analysis® Interviewing Techniques

Learn how to detect deception
in a verbal and written statement

Statement Analysis® is the process of examining how a person phrased their statement in order to determine if the subject is being truthful or deceptive. Even though people may lie and withhold information, their words will betray them. People will often give us information they did not intend to share. The key to detecting deception is to know what to look for in a person's statement.

In this training, Mark McClish will share his techniques on how to analyze a verbal and written statement to detect deception. He will also provide insight on how to obtain additional information from a statement. By using excerpts from today's headlines, Mark gives a presentation that is current and interesting. After attending this class, you will begin to observe things in a verbal and written statement that you never noticed before.

These are the original Statement Analysis® techniques created by Mark McClish over the last 30 years.

MARK McCLISH

Mark McClish is a retired Supervisory Deputy United States Marshal. From 1990 - 1999, he taught interviewing techniques at the U.S. Marshals Service Training Academy. During this time, he conducted research on deceptive language and developed the Statement Analysis® techniques to determine if a person is lying or telling the truth.

After retiring from the Marshals Service in 2009, Mark started Statement Analysis LLC. His company provides interviewing skills training and assists in analyzing verbal and written statements. Mark has appeared on numerous television shows and podcasts. He is the author of the books *I Know You Are Lying* and *Don't Be Deceived*.

WHO SHOULD ATTEND

This training is designed for anyone who wants to improve their interviewing skills. These techniques can be used in an investigation, in a legal proceeding, when listening to a 911 call or when examining a written statement. This training is open to interviewers from all fields: law enforcement, loss prevention, law, security, social workers, human resources, etc.

THE TECHNIQUES

Statement Analysis® is the most accurate way of detecting deception. Polygraphs limit you to asking "Yes" or "No" type questions. Body language techniques can be hard to recognize and require interpretation. With the Statement Analysis® techniques, you never have to guess or infer. This is because people mean exactly what they say.
